

What uses the most Energy In Your Home?

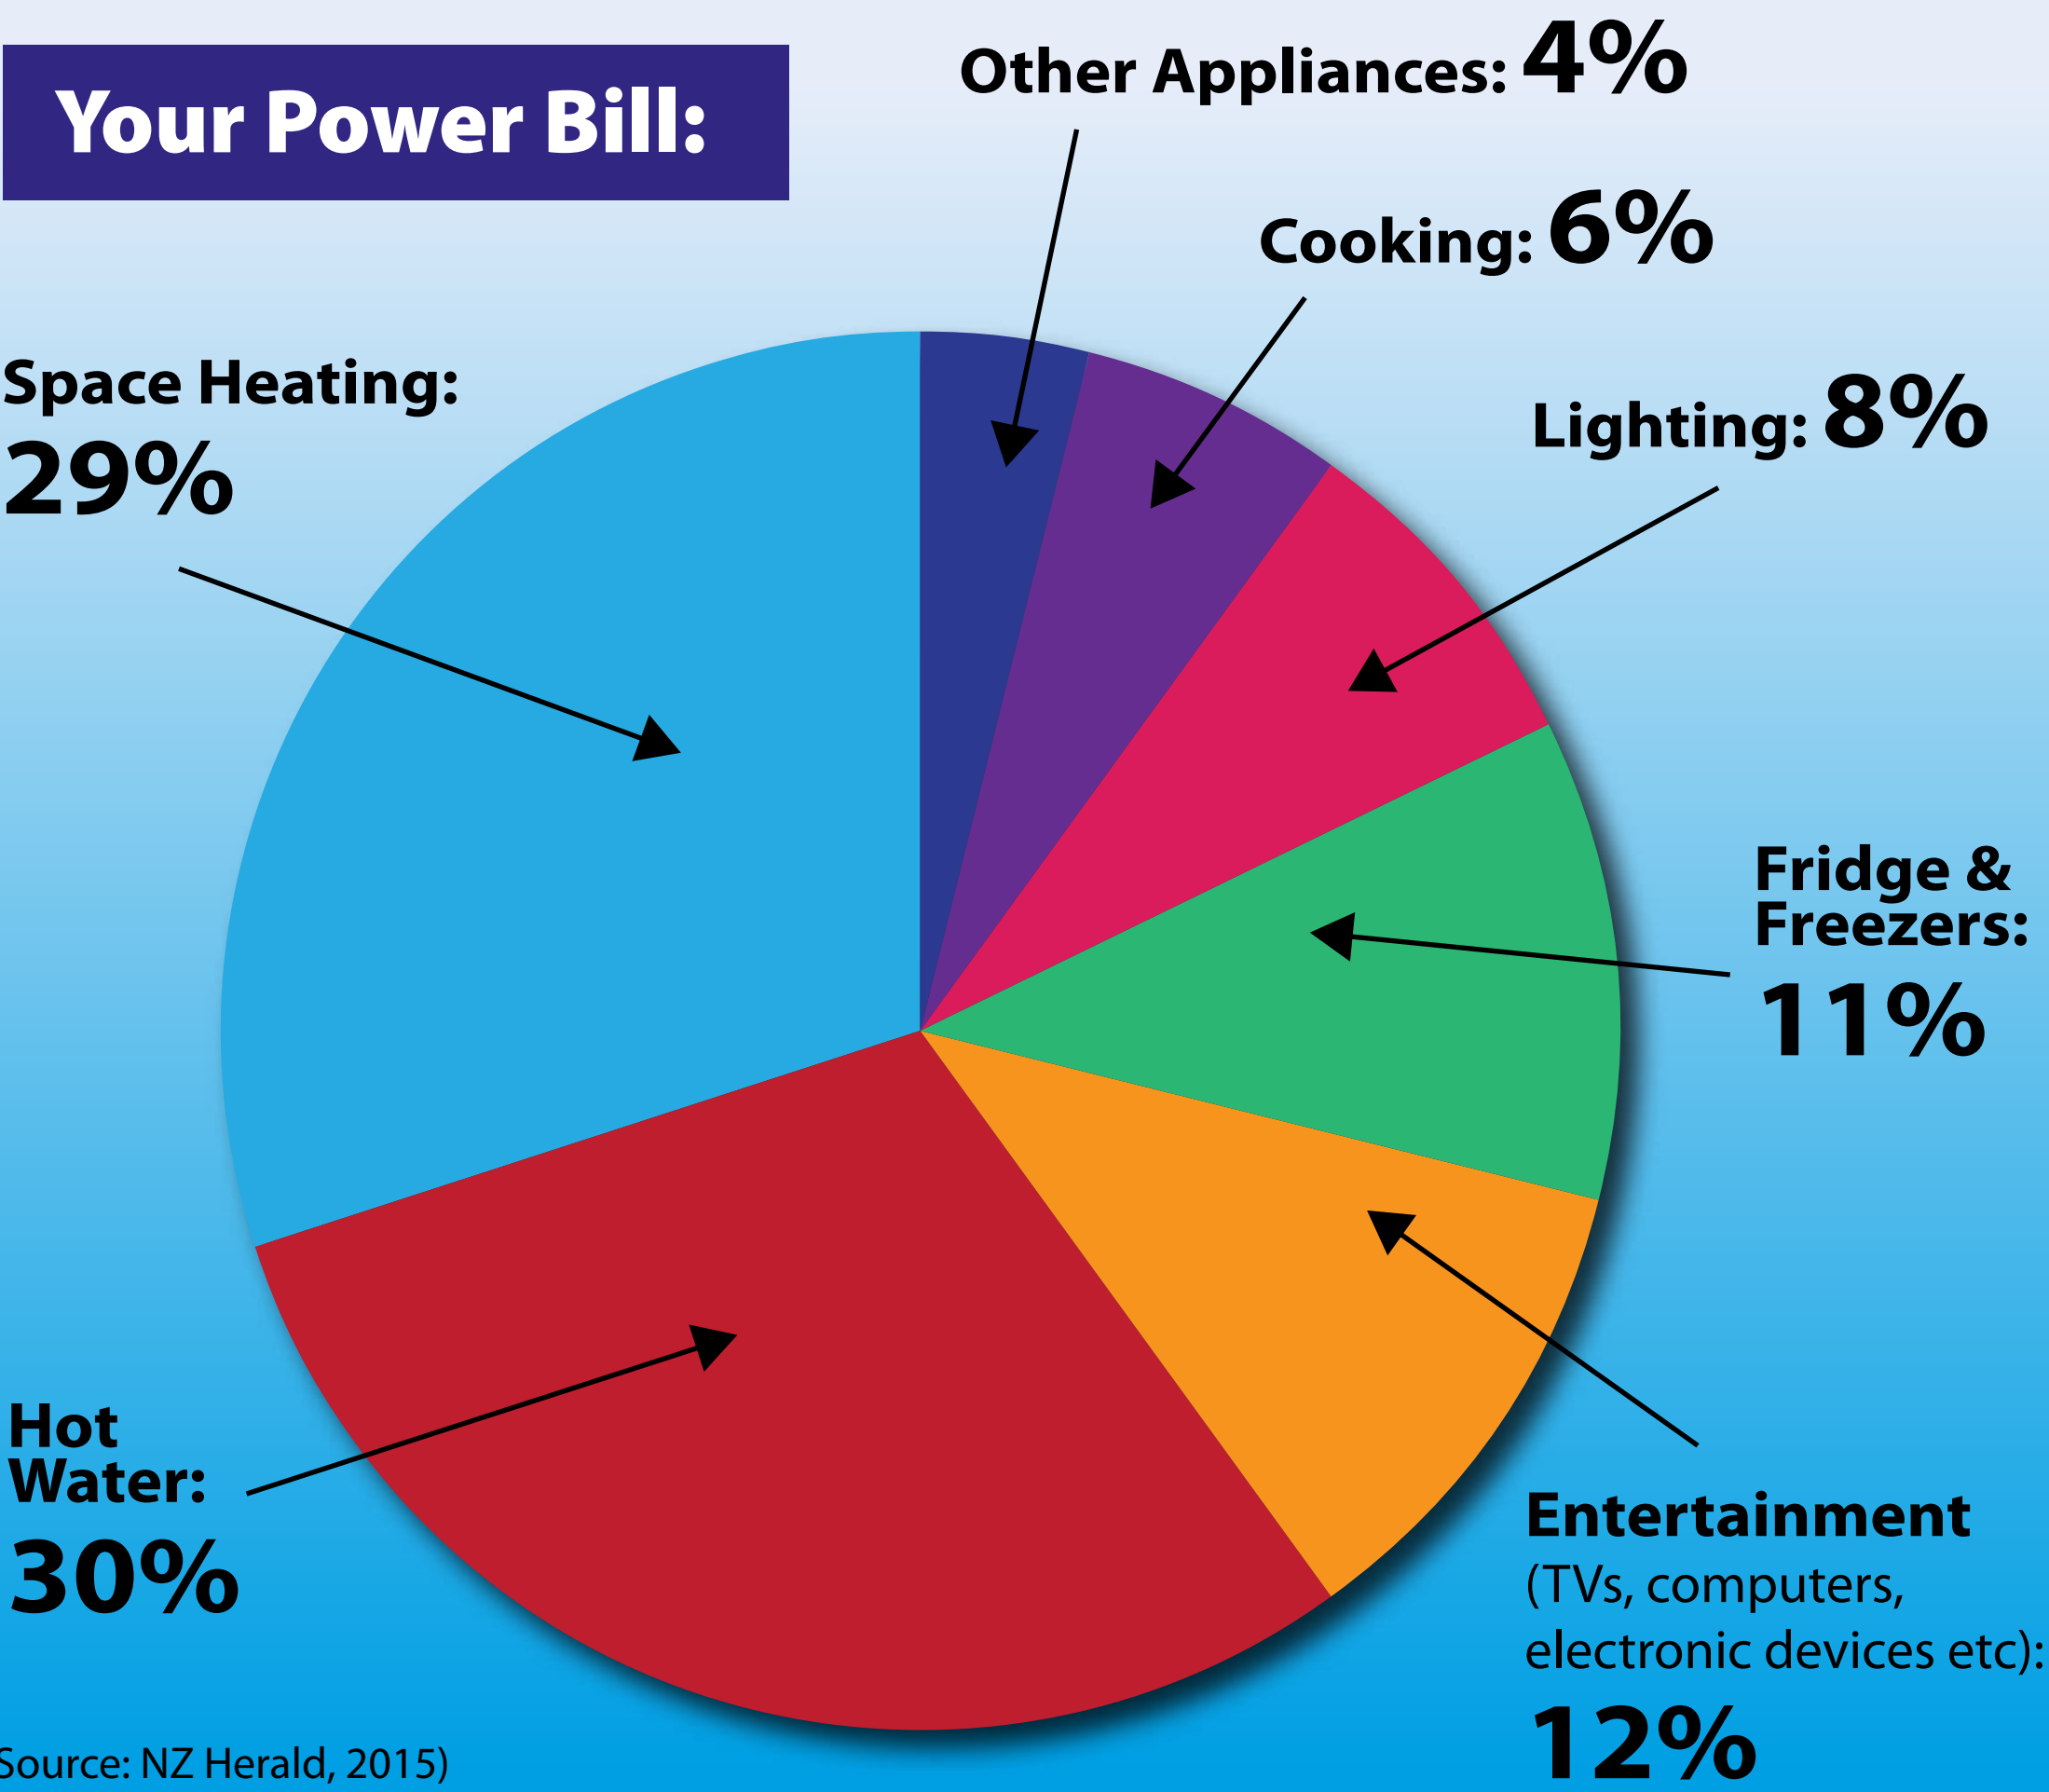

When it comes down to saving energy and money, it is important to know and understand the biggest and costliest energy users in your home.

New Zealand homes are responsible for about 11% of the country's total energy use and 7% of energy-related emissions

How much do you spend every day at home?

15-Year-Old Fridge Freezer:
51¢ per day

Computer with LCD Screen
4¢ per hour

Heat Pump
30¢ per hour minimum to
40¢ per hour maximum

100W Traditional Lightbulb
60¢ per day (24 hours)

Large bath:
\$1.54

Shower:
83¢ for 10 minutes

New Fridge Freezer:
32¢ per day

The Household Energy End-Use Project monitored 400 randomly selected homes from Invercargill to Kaikohe to analyse power consumption...

Outside of heating, hot water, lighting and cooking, these were the most expensive appliances to run:

Fridge freezer	621 kWh/year
Dehumidifier	554 kWh/year
Heater	488 kWh/year
Spa	398 kWh/year
Dishwasher	211 kWh/year
Dryer	173 kWh/year
Electric kettle	157 kWh/year
TV	132 kWh/year
Washing machine	59 kWh/year
Toaster	20 kWh/year
